Equipment is best rented as a unit as it is important to have lightweight backpacking gear. This applies especially to the tent and sleeping bag. Please email with your gear specifications if you plan to use your own gear and have yet to backpack with it. The goal is that all hikers are able to carry the weight of their packs comfortably and to fit all gear. The weight and pack size of all gear should be taken into consideration before hitting the trail. Please practice packing all your items including food, water, and extra clothing, if you plan to use your own gear.
